

ALBEX (Albendazole) 10% W/V USP – FOR ANIMAL TREATMENT ONLY

- ❖ **ALBEX** is a broad spectrum multi-purpose anthelmintic for the control of mature and developing immature forms of gastrointestinal and pulmonary nematode infections, tapeworms and adult liver fluke in cattle and sheep.
- ❖ Albex 10% is ovicidal against fluke and roundworm eggs, thus reducing pasture contamination.

DIRECTIONS FOR USE:

- ❖ For oral administration only. Use properly calibrated dosing equipment. Estimate bodyweight accurately.

CATTLE:

- ❖ For the control of roundworms, lungworms, tapeworms, roundworms and fluke eggs: Give 7.5mls of albendazole 10% per every 100kgs bodyweight.
- ❖ For the additional treatment of adult liver fluke give 10mls of Albex per every 100kgs bodyweight.

SHEEP:

- ❖ For the control of roundworms, lungworms, tapeworms, roundworms and fluke eggs: Give 1ml of Albex per every 20kg bodyweight.
- ❖ For the additional treatment of adult liverfluke give 1.5mls Albex per every 20kg bodyweight.
- ❖ Cattle over 400kgs - give a further 3.75mls or 5mls for each additional 50kg bodyweight.
- ❖ Sheep over 80kgs – give a further 0.5mls or 0.75mls for each additional 10kg bodyweight.

PRECAUTIONS:

- ❖ Shake container before and during use. **Do NOT** use in sheep producing milk for human consumption.

WITHDRAWAL PERIODS:

- ❖ Cattle may only be slaughtered for human consumption 14 days after treatment. Use milk for human consumption only 60 hours after treatment.
- ❖ Sheep may only be slaughtered for human consumption 4 days after treatment.
